

2022 Oakville Hospital Foundation

Innovators Program

The
INNOVATORS

The Innovators is a group of like-minded individuals that aims to engage young professionals in philanthropy while providing enriching networking opportunities within the hospital and our community.

Since the programs inception in 2019, The Innovators have contributed more than \$70,000 to invest within Oakville Trafalgar Memorial Hospital.

Impact & Highlights

NOVEMBER 2020

Supporting Mental Health Program

In 2020, the Mental Health program was chosen as the recipients of the Innovators collective gift.

Innovators were able to fund priority needs which ensure the health and safety of patients and caregivers and to improve the way care is accessed, measured, and delivered.

These items include: A three camera video monitoring system enabling nurses to monitor the Brief Assessment Service waiting area from inside the care station. A 'push' door leading into the care station in the Constant Observation Unit - which is for the most acute adult patients. Digital Assessment & Monitoring Tools for Psychotherapy which allows patients with a digital portal to complete self-report assessments on their mental health.

OCTOBER 2021

Community Spirit Award Winners

The Innovators Council are the 2021 recipients of the Community Spirit Award for Group Volunteer.

Oakville Community Spirit Awards are presented to individuals, organizations, businesses and community groups who have demonstrated ongoing leadership, dedication, and involvement in Oakville.

DECEMBER 2021

Supporting Cancer Care

In 2021, the Breast Diagnostic Assessment Program (BDAP) was chosen as the recipient of the Innovators collective gift.

Patients are referred directly to the program, where a multidisciplinary care team are involved in the patient's care pathway, ensuring high-quality timely care and a patient-centered approach. Funding supported The Patient Navigator which is a pivotal role. Navigator's guide patients through the program in a timely manner, explaining any required procedures, all while providing emotional support.

The support from The Innovators has made a meaningful impact on the lives of those women in our community facing a potential breast cancer diagnosis.

Why Become An Innovator?

Being an Innovator allows you to meet young professionals and industry leaders for a semi-formal evening of networking and education.

Throughout the year, Innovators build their understanding of our community's healthcare needs and how the group can help address these priorities through three exclusive and engaging events.

Together, the Innovators vote on how their funds will support the community at the year-end allocation event.

By pledging your yearly commitment, we will be able to collectively support one of the high priority areas at Oakville Trafalgar Memorial Hospital.

"The Innovators has provided us the opportunity to connect with other young professionals who strive to support and enrich the community where we live and work.

We have learned so much about our hospital and healthcare needs through the efforts of this group, and having a voice to decide which areas our dollars are specifically being contributed to, has made the experience even more engaging and fulfilling."
